

# ELISA KIT FOR PROTEIN A DETECTION

We are the exclusive distributor for the Immunsystem (IMS AB) Protein A ELISA kit in the US. This kit is designed for those clients who require a highly sensitive monitoring tool to measure small amounts of contaminating Protein A in their antibody products.

The Protein A ELISA kit is often used for quality control of antibody products to monitor Protein A leakage during purification.

This kit has several features that make it unique:

- Recovery is close to 100%
- Sensitivity is 0.1ng/ml for samples without IgG, or 1ppm for samples with IgG
- Dynamic range is at least 3 logs
- Protocols for samples with and without IgG
- 96-well microplate, 8 x 12 strip format
- Chicken antibody for both coating and detection (minimizes non-specific interactions)

## Protein A Detection ELISA

Product	Cat. No.	Size	Price
Protein A ELISA	COZ51-188	96-Wells	\$695
