

NEPHELOMETRIC AND TURBIDIMETRIC REAGENTS

We offer Nephelometric and Turbidimetric reagents to meet your specific instrumentation requirements. As an industry "preferred vendor", we are committed to excellence in the supply of high quality products and services.

Antisera Product and Service Offerings Include:

- Albumin
- Alpha 1 Acid Glycoprotein
- Alpha 2 Macroglobulin
- Apo AI
- Apo B
- C-Reactive Protein (CRP)
- Complement C3
- Complement C4
- Haptoglobin
- IgA, IgG (Fc), IgM
- Kappa Light Chain
- Lambda Light Chain
- Lipoprotein (a)
- Prealbumin
- Transferrin
- Lot-to-lot consistency and product reproducibility
- Large lot availability
- Custom products and custom program design experience
- Technical expertise to support your project requirements

When our standard products do not meet your needs, we will provide a quotation on customized products. Our custom expertise has assisted numerous companies in achieving their specific instrumentation / project requirements. We welcome inquiries to design a product with unique buffers, concentration, specific methodologies to determine concentration, linearity, prozone, % recovery or custom packages.

To request product specifications, bulk pricing, large lot availability or sample information, contact us.

Quality and Commitment:

- FDA registered facility
- QSR, Quality System Regulation Documentation
- Committed to total customer satisfaction

For Research or Further Manufacturing Use Only. Not for Use in Diagnostic Procedures.
